Sorry, I thought Outlook sent it correctly, apparently not.

Here's what it should have looked like. There are 3 fields (Kern River, Gujarral Hills, Sutter Buttes) where the formation/zone was asterisked. Does this signify anything? My understanding is that these listed formation/zones were exempted based on the Primacy Application for Non-hydrocarbon injection. Perhaps, additional information (e.g., updated production data that time) came to light that the formation/zones were also HC producing and it was just "noted" by the asterisk. But the extent of the exempted area for these zones in the indicated fields was still defined by the lateral limits in the primacy application. Is this interpretation consistent?

Exempted 1425 Demonstration Aquifers

All oil and gas producing aquifers identified in Volumes I, II, and III of the California Oil and Gas Fields submitted in the 1425 Demonstration dated April 20, 1981 are exempted.

In addition, the following aquifers are also exempted.

<u>DISTRICT</u>	<u>FIELD</u>	<u>FORMATION/ZONE</u>
2	Ramona	Pico
2	Oat Mountain	Undiff.
2	Simi	Sespe
3	San Ardo	Santa Margarita
3	San Ardo	Monterey "D" Sand
3	San Ardo	Monterey "E" Sand
3	Monroe Swell	Santa Margarita

4	Mountain View	Kern River
4	Pleito	Chanac
4	Pleito	Kern River
4	Poso Creek	Santa Margarita
5	Coalinga	Santa Margarita
5	Coalinga	Etchegoin-Jacalitos

5	Helm	Tulare-Kern River
5	Riverdale	Pliocene
5	Turk Anticline	San Joaquin
6	Sutter Buttes	Kione*
	Gas	

* oil and/or gas producing

What's the interpretation of this?

Hi Jerry,

George and I just looked at this email together and we cannot tell what the arrows are

pointing at and there is no attachment, I think we are going to have to discuss this.
Give me a call at your convenience.

Hi Michele,

Our MOA Attachment 2 has 3 fields where the Non-hydrocarbon Formation/Zone has been exempted with an asterisk, indicating that the formation/zone is “oil and/or gas producing”. Does this asterisk with the remark signify anything?
